

## Trade, Investment, Environment, Culture

### International Eco Commerce Partnership (IECP)

The IECP, promotes **trade, investment, and cultural exchange** between North America, South America, Europe, Asia, Near East, Africa, South, West Pacific, and Small Islands.

The IECP enables leaders in business, policy, and academia to meet and learn from one another.

Thanks to [IECP's web-based portal](#), now much wider business audience can actively learn and participate in global Eco Commerce.

The IECP acts as an educational platform and aggregator, addressing regional and industry challenges, revealing opportunities, and featuring Eco Technologies and Influencers in Sustainable Development, Climate Change, Energy, Water and Sanitation, Biodiversity, Forests, Land, Chemicals and Wastes, Resilience, Finance, and more.

Since 2006, US and EU based experts, enterprises and organizations have innovated and collaborated through IECP with one another.

The IECP is poised to satisfy the need for up-to-date strategic knowledge sharing demanded by business, who need to keep abreast of fast changing business landscapes across regions and business sectors.

Companies can lease a virtual showroom for 12 months to feature their Technology, Best Adaptation Solutions (BAS), and Eco Commerce Solutions (ECS) to highly targeted audience of business leaders and investors.

The visitors can now easily access the knowledge of a dynamic network, before only available to a select few. Visitors can join a regional showcase to learn "Who is Who" in economic, political, environmental, and social landscapes. The marketplace aligns perfectly with all size corporations, government agencies, nonprofits, and NGOs.

#### Key target industries include:

##### Energy Generation

- including renewable energy.
